DATE: January 16, 1975

FROM : Lee Peha

SUBJECT : DISPOSAL OF PCB: POLYCHLOROBIPHENYL (Askarel-Inertene)

Any material containing P.C.B., liquid, dirt, sorball, capacitors, etc., will be sent to:

Gene Rinebold
West Con Incorporated
Garrett Freight Lines to Grandview area
"Old Missile Site"
Grandview, Idaho
Phone 208-733-0897

West Con Incorporated will dispose of it for 3½¢ per lb. plus freight costs.

For storing this PCB until shipment, contact Don Sherwood at 3324. He now has in storage some PCB in 55 gallon drums and some material saturated with PCB in plastic bags and stored in 5 gallon cans.

City Light equipment that contains PCB:

- a) 2.750 KVA transformers with 675 gallons each at Kaiser Gypsum Co.
- b) All capacitors on system.
- c) Plus some unit substation service transformers and the station services at South Sub.

When shipping this material describe and label: "WASTE CHEMICALS CONTAINING P.C.B."

Any material contaminated by P.C.B. must be sent to this disposal site. Mr. Sherwood will strap the B.O. capacitors to pallet boards for shipment to this company in Idaho.

Men in the field handling any P.C.B. shall wear rubber gloves and long sleeves. Further questions on this matter should be referred to the Safety Division, City Light Building, 447-3270.
